With 20,000 partners across 40 cities, Fantuan is the largest Asian food delivery service in North America, Australia, and the United Kingdom. Fantuan relies on 17,000 drivers to fulfill orders for their two million customers.

“Before, we needed local staff to carry out background checks. With Certn, we can have one person doing checks for multiple regions and it’s all connected through one dashboard.”

James Chan

Operations Manager, **Fantuan**

Cutting Costs with Borderless Screening

Fantuan works in a competitive environment where they’re fighting for the attention and retention of independent contractors. Fantuan relies on 17,000 drivers to fulfill orders for their two million customers.

Before Certn, if Fantuan wanted to expand its operations and start onboarding drivers in new jurisdictions, they had to hire an operational employee in that region. With Certn, Fantuan can easily run global background checks without the added cost of more full-time employees.

Efficiency in a dynamic industry

Fantuan was using a competing vendor that couldn't provide the accuracy, turnaround times, or user experience they needed. The faster they get a result on the background check, the sooner they can onboard the driver and have them working. If there's a spike in demand for drivers, they can fill roles quickly and with peace of mind.

"We have to be mindful about who we welcome to our fleet. We're responsible for caring for our customers."

James Chan
Operations Manager

With Certn:

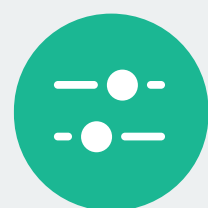

Accurate Results

Faster Turnaround Times

Seamless UX
